U.S. Patent and Trademark Office PTOL-303 (Rev. 04-01) Continuation of 5. does NOT place the application in condition for allowance because: the recitation an oxygen mask has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See In re Hirao, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and Kropa v. Robie, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951) The device of Rudolph/Dyrud is fully capable of performing the claimed limitations, because the invention is directed towards means for securing. Final rejection is maintained to the Amendment filed 3 September 2002.
